# **Create User Define Function in Apache Pig and execute it on map reduce**

#### Aim:

To create User Define Function in Apache Pig and execute it on map reduce

### **Procedure:**

# 1. Firstly install PIG

Step 1: Login into Ubuntu

**Step 2**: Go to <a href="https://pig.apache.org/releases.html">https://pig.apache.org/releases.html</a> and copy the path of the latest version of pig that you want to install. Run the following comment to download Apache Pig in Ubuntu:

\$ wget https://dlcdn.apache.org/pig/pig-0.16.0/pig-0.16.0.tar.gz

**Step 3**: To untar pig-0.16.0.tar.gz file run the following command:

\$ tar xvzf pig-0.16.0.tar.gz

**Step 4:** To create a pig folder and move pig-0.16.0 to the pig folder, execute the following command:

\$ sudo mv /home/hdoop/pig-0.16.0 /home/hdoop/pig

**Step 5:** Now open the .bashrc file to edit the path and variables/settings for pig. Run the following command:

\$ sudo nano .bashrc

Add the below given to .bashrc file at the end and save the file.

#PIG settingsexport PIG\_HOME=/home/hdoop/pigexport

PATH=\$PATH:\$PIG\_HOME/binexport

PIG\_CLASSPATH=\$PIG\_HOME/conf:\$HADOOP\_INSTALL/etc/hadoop/export PIG\_CONF\_DIR=\$PIG\_HOME/confexport JAVA\_HOME=/usr/lib/jvm/java-8-openjdk-amd64export PIG\_CLASSPATH=\$PIG\_CONF\_DIR:\$PATH#PIG setting ends

**Step 6:** Run the following command to make the changes effective in the .bashrc file:

\$ source .bashrc

**Step 7:** To start all Hadoop daemons, navigate to the hadoop-3.2.1/sbin folder and run the following commands:

\$ ./start-dfs.sh\$ ./start-yarn\$ jps

**Step 8:** Now you can launch pig by executing the following command:

\$ pig

**Step 9:** Now you are in pig and can perform your desired tasks on pig. You can come out of the pig by the quit command:

> quit;

# 2. Create UDF in Pig

Create	а	samp	le	text	file
--------	---	------	----	------	------

hadoop@Ubuntu:~/Documents\$ nano sample.txtPaste the below content to sample.txt

- 1,John
- 2,Jane
- 3,Joe
- 4,Emma

hadoop@Ubuntu:~/Documents\$ hadoop fs -put sample.txt /home/hadoop/piginput/

#### **Create PIG File**

hadoop@Ubuntu:~/Documents\$ nano demo\_pig.pig

# paste the below the content to demo\_pig.pig

-- Load the data from HDFS

data = LOAD '/home/hadoop/piginput/sample.txt' USING PigStorage(',') AS (id:int>

-- Dump the data to check if it was loaded correctly DUMP data;

-----

# Run the above file

hadoop@Ubuntu:~/Documents\$ pig demo\_pig.pig

2024-08-07 12:13:08,791 [main] INFO org.apache.pig.backend.hadoop.executionengine.util.MapRedUtil

```

#### Note:

If any error check jython package is installed and check the path specified on the above steps are give correctly

------

### To check the output file is created

hadoop@Ubuntu:~/Documents\$ hdfs dfs -ls

/home/hadoop/pig\_output\_dataFound 2 items

If you need to examine the files in the output folder, use:

To view the output

hadoop@Ubuntu:~/Documents\$ hdfs dfs -cat /home/hadoop/pig\_output\_data/part-m-00000

### **OUTPUT:**

## **Result:**

Thus the User Define Function in Apache Pig and execute it on map reduce is executed successfully.
